ROLE OF TREES IN CLIMATE CHANGE MITIGATION

CITY

TREES

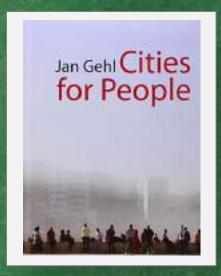

Photos: www.pilsetacilvekiem.lv

- ✓ researched the importance of trees in Rīga city;
- ✓ gathered information;
- analyzed actions of the Rīga city council;
- drew the conclusions.

Interview in e-mail with Edmunds Cepurītis,

Chairman of the Housing and EnvironmentCommittee of the Riga City Council.

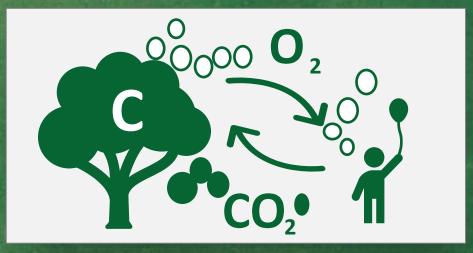

Trees in Riga city are not only for aesthetic, they:

- ✓absorb harmful gases
- release oxygen
- lower temperature
- ✓ provide shade

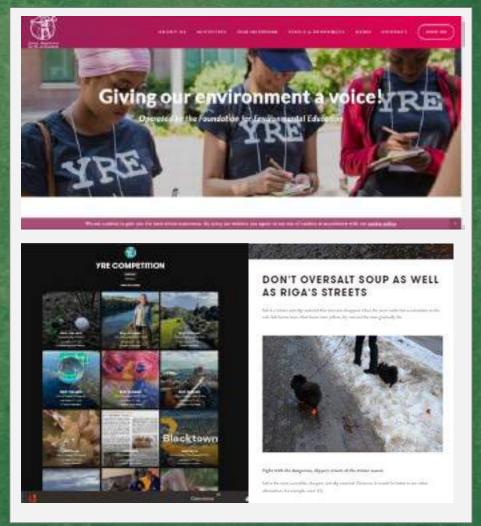

Young Reporters of Environment

Young Reporters of Environment

DON'T OVERSALT SOUP AS WELL AS RIGA'S STREETS

Salt is a winter anti-slip material that does not disappear when the snow melts but accumulates in the soil. Salt harms trees, their leaves turn yellow, dry

Fight with the dangerous, slippery streets of the winter season

Salt is the most accessible, cheapest antislip material. However, it would be better to use other alternatives, for example, sand. [1]

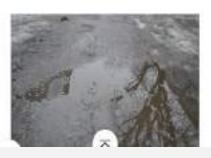

Salted snow threatens city's trees – photo materials show violations against trees

Snow will melt, but the salt will not disappear

"Many junitors haven't noticed that they are doir towards the issue," adds Cepuritis [2]

E-cigaretes mida toksisku atkritumu plūsimu, bet tas nav nenozīmīgs atkritumu daudzums. Mēs runājam par miljardiem elektronisko cigarešu atkritumu katru gadu un tā ir globāla problēma, atzīst arī Kalifornijas Sanfrancisko universitātes (UCSF) zinātnieki. [8]
